**Subject:** Re: Red and Bonita Mine Bulkhead and April Mtg

Thanks Steve. I think that having the piping component in the R&B was an important item to some people. I'll let you know if I hear about more questions.

Are you planning on attending the mining conference in Telluride at the end of May?

Peter

Peter,

The days have gotten away from me in terms of returning your call. So, I wanted to send a quick note, but I am happy to talk next week if you would like to discuss this more. In short, the following updates are provided in answer to your voicemail questions:

1. Red and Bonita bulkhead planning is underway and we have budgeted that work for this year.
2. The bulkhead design includes a piping component to allow for potential future injection of insitu treatment reagents.
3. Gold King Mine adit rehab work is also scheduled for this year. I have discussed this with Todd Hennis also.
4. I do not have plans to attend the April 28<sup>th</sup> ARSG meeting, but Allen Sorenson, DRMS and I have set aside the time in May to attend the ARSG meeting and go over the design and plans for the R n B, etc.

Please let me know the date for the May ARSG meeting. If you would like to discuss this further, please let me know a time next week that I could call you.

Sincerely,

Steve
